BACHELOR OF NURSING SCIENCE

International 4-year Program

About the Program

Our Bachelors of Nursing Science program will help you acquire all the skills needed to guide, support, treat, and rehabilitate the patients you serve. You will have the opportunity to learn from our well-experienced and well-renowned faculty in a truly inspiring environment.

Accreditation

Our Bachelors of Nursing Science program is approved and accredited by Thailand's Nursing and Midwifery Council and The Office of Higher Education Commission. We continuously collaborate with Thailand's Nursing and Midwifery Council to enhance the quality of the program.

We have partnered with numerous hospitals and medical centers to connect our talented nursing students to internships in Thailand's dynamic medical sector. It's our honor and privilege to work with these remarkable organizations in offering this essential opportunity for real world practice to our students.

What You Will Learn

The curriculum includes both a biological and a philosophical foundation with emphasis on health care development and community engagement. Courses are delivered by our nationally-recognized faculty and take advantage of our outstanding laboratories and hospital simulation facilities.

For the first year of the program, students are immersed in intensive English language training which is crucial for effective communication and collaboration with multi-national patients, health professionals and policy makers.

Practicum courses are hosted at numerous hospitals where you will acquire essential on-the-job experiences.

Within the final year of the program, students are required to complete a 6-week internship within hospital wards or departments of your choosing. Here students learn to work with patients of all ages and cultural backgrounds.

Career Opportunities

The program is designed to prepare nurses for a variety of healthcare settings – from hospitals and clinics, to private practices and community agencies.

- Nurse for public or private hospitals
- Occupational Health nurse
- Nurse for special agencies, such as the Centers for Disease Control and Prevention
- Nurse for Health Care Services, such as clinics, beauty spas, and infant welfare centers
- Nursing Academic for educational institutes

Further Study Abroad

Students may choose to study further abroad through our academic collaboration with Waiariki Institute of Technology in New Zealand.
