# BACHELOR OF SCIENCE in Occupational Health and Safety

## About the Program

“Safety, safety, safety!” These are often the first three words uttered when industrial trainers for manufacturing and service companies welcome their new employees. And why shouldn't they be? World standards dictate that life is more valuable than profits and a safe workplace is tantamount to company and employee well-being. Workplaces in Thailand are safer than ever, thanks to the imperative contributions made by Occupational Health and Safety professionals.

St Theresa International College is proud to be one of the few selected institutes to offer the international program for the Bachelors of Science in Occupational Health and Safety. With this program you have a first-hand glimpse into occupational health policies and procedures established not only in Thailand but also around the world.

## What You Will Learn

Courses are designed to help you develop skills needed for managing health and safety systematization and enforcement of safety regulations in

workplaces. Based on a strong science foundation, the program encourages you to enhance professional scientific skills such as the ability to utilize advanced technologies, observation, precision, and critical thinking.

During the final year of the program, you will be required to undertake internship in actual workplaces that are linked to STIC. Through internships, students will develop their skills as they apply learning directly into practice.

Completion of the program means that you will be ready to work for both national and international industries.

## Program Objectives

1. You will be able to incorporate health and safety related measures in the workplace.
2. You will be able to examine the workplace in order to identify hazards.
3. You will be able to formulate solutions which will help in mitigating hazards.
4. You will be able to collaborate with professionals of other disciplines in order to minimize/prevent hazards.
